Endnotes

1 The list does not include Registered Student Organizations (RSOs) at the University.
2 PPE mobilizes the University of Delaware’s research, educational, and public service resources and provides systematic coordination of individual efforts on campus in order to leverage the greatest support for partnership work between the University and organizations across Delaware.
3 A state-funded collaboration between the Delaware Department of Education and the University of Delaware Library providing online magazines, journals, encyclopedias and training for all Delaware K-12 public schools.
4 The Science for All Delawareans STEM initiative organizes K-12 tours, Delaware BioGENEius Challenge, and teacher professional development.
5 Designed to create confident education professionals by providing students with real-world experiences in diverse school settings, as well as the opportunity to earn an Associate of Arts degree, a Bachelor of Secondary Education, a master’s degree or doctoral degree.
6 Nationally accredited, interdisciplinary programs that empower students to make a difference in the fields of early childhood, human services, and human relations. Teaches students to develop programs, services and policies that support young children, individuals and families.
7 State-approved program of professional education coursework, which offers an alternative to the traditional route to teacher certification in Delaware. Qualified individuals can complete certification requirements while they are employed as full-time teachers.
8 Conducts research to help policymakers and practitioners in education, health care and human services determine which policies and programs are most promising to improve outcomes for children, youth, adults and families.
9 A collaboration among UD, Univ. of Penn, and Univ. of Minn. formed Research4Schools.org, designed to examine the study of research use and expand the application of research in schools by identifying strategies to make more meaningful application to classroom practice.
10 A professional development, research, and policy center working to improve public education that provides a range of research-based training programs, policy initiatives and consulting services to education leaders.
11 Serves both pre-service and in-service teachers, improves access for the education community to the University’s teacher education and professional development programs, and supports the state’s efforts to enhance teacher education and professional development in line with new state content standards and accountability requirements.
12 Supports early childhood professionals through professional development experiences that enhance skills, knowledge and career opportunities, while also supporting high quality programs working in a variety of early childhood settings.
13 Trains agency leaders worldwide to create more inclusive environments within their agencies and the community.
14 Meets the needs of the K-12 education community by providing professional development and forming partnerships with educators to help them meet the challenges of educating all 21 century learners.
15 Focuses on improving the quality, quantity, and range of public and private services and supports available in Delaware for individuals with disabilities and their families.
16 Offers training and support for early childcare providers to help them increase the quality of care they provide Delaware’s children.
17 A resource library that provides educators—PreK through college—with classroom materials, instructional resources and services including maps, games, books, manipulatives, assistive technology, a laminator, smartboard training, and a makerspace.
18 Partners with local school districts to provide UD students with field placements and student teaching.
19 Provides College of Education and Human Development faculty and staff leadership and support for the effective uses of technology in instruction, research, administration and outreach.
20 The College of Education and Human Development in partnership with the Christina School District and Stubbs Elementary School work to: improve K-2 literacy instruction, integrate educational technology to support instructional and administrative activities, develop a system of support for positive behavior and mental health, promote community involvement in the school, place UD teacher candidates in field experiences supervised by UD field instructors and Stubbs’ clinical educators.
21 Invites families and children to participate in research focusing on language development, spatial relationships, and learning through play.
22 Provides services for children and their families including assessments; intervention services and parenting education; technical assistance and training for childcare providers; a laboratory for faculty and student researchers; and a hands-on learning site for undergraduate and graduate students.
23 Services over 60 children ages two to five and serves as a research site for faculty. Over 100 UD students per semester receive instruction in early childhood education, research, and human service practices in the school.
24 This interagency program is designed to serve women who are pregnant, and families who have children between the ages of birth and 36 months.
This specialized school serves children in grades 1-8 with learning differences, helping them become successful learners. Curriculum and instruction are developed by UD faculty members, while student teachers and researchers gain valuable insights in the fields of education and human development.

Provides quality Secondary Education programs that prepare young people to become highly qualified professional teachers.

An educational partnership between the University of Delaware and five New Castle County school districts that is designed to strengthen teaching and learning in the community's public schools.

Aims to provide every college-ready graduating high school senior with the opportunity to apply during the school day to at least one postsecondary institution.

Prepares K-12 educators and students in economics, personal finance and entrepreneurship by providing dynamic, effective and standards-based professional learning, resources and programs.

An international competition giving students the opportunity to put their entrepreneurial ideas into action, while learning more about the entrepreneurial process.

Workshops for middle and high school students to learn about entrepreneurship, while identifying critical world problems, brainstorming creative solutions, and practicing the design thinking process.

A 3-day conference providing students, educators, and supporters from around the world the opportunity to develop new skills while energizing their entrepreneurial spirit.

A program for high school teachers who are interested in utilizing the University's Horn Entrepreneurship's state-of-the-art, evidence-based curriculum with their students.

Offers engineering learning opportunities for students from Kindergarten to High-School.

A student organization that seeks to positively impact young mechanical engineers through recruitment, retention, and advancement in the University of Delaware and the surrounding community.

A collaborative of nearly 600 K-12 educators, university geographers, pre-service education faculty, and GIS practitioners, all working together to strengthen geography education in Delaware.

A program, sponsored by the Cooperative Extension Service of the University of Delaware and Delaware State University, where kids complete hands-on projects in areas like health, science, agriculture, and citizenship.

Provides programs for families through education, applied research, and outreach to improve the quality of their lives.

Engages young learners in grades K-4 with environmental science and horticultural programs designed to complement Delaware State Science Education standards.
